

ECE 4564, Assignment 1

Team Name : Team 6

George Boyer

Kshitej Jadhav

Samuel Giacinto

Libraries imported:

- os
- tweepy
- pickle
- socket
- sys
- getopt
- hashlib
- watson_developer_cloud
- json
- Argparse
- fernet
- datetime

The client and server and variables (including keys) are stored in clientVariable.py and serverVariable.py. The variables and imports used by the bridge are stored in /src/ folder. The initialization process for all three follow the convention given in the assignment.

All the user defined functions for the bridge are in files stored in /src/ folder. The imports for server and client are included in serverImport.py and clientImport.py respectively.
